

90 Days to a Learning Platform You'll Love

Leave the endless clicks, complex workarounds, and subpar reporting behind. Go live in **90 days** with ExpertusONE, the learning platform designed with you in mind. We've made it easy to move forward with the learning platform chosen by enterprise leaders like Siemens, Hitachi and ABB.

ExpertusONE provides unmatched depth of function combined with consumer-grade usability. With decades of experience in enterprise learning systems, we know how to provide you with a quick and painless migration to a solution that can meet your complex needs with ease.

The ExpertusONE Success Plan

Change can feel daunting, even when it's for the better. But with our straightforward design and extensive experience with enterprise learning migrations, it's smooth sailing.

Planning for success

Kickoff

Week 1

Get ready to engage your learners, realize your vision, and move the needle on organizational development. Meet the team, review the plan, and get started!

During Kickoff:

- You'll meet your dedicated ExpertusONE account executive
- Together we'll:
 - Review requirements uncovered during sales discovery so that we can ensure that we understand your organization's unique requirements
 - Review goals of migration and the desired outcomes, including identifying project key performance indicators (KPIs)
 - Establish a regular cadence to meet and execute the success plan
 - Review the ExpertusONE platform
 - Establish project milestones & deliverables

Migration

Weeks 2-6

We know the data schema of most LMSs inside and out so you can leave the bulk of the migration to us. For those nuances, workarounds, and customizations you've added in, we'll work together to figure out where to put the data.

During Migration:

- Together we'll:
 - Identify any areas where data cleanup is necessary and determine cleanup plan
 - Identify which parts of your current system can be migrated directly, and which need a deeper dive
- **ExpertusONE** will migrate the core elements of your system - usually 60-70% of the tables-using robust data migration tools and methodologies

- For the remaining tables, you tell us how they're used, and we'll figure out where they go
- With information from you about your systems, we'll configure data connectors

Configuration & Branding

Weeks 7-8

ExpertusONE setup is simple and straightforward and, best of all, designed for flexibility. You aren't locking yourself into anything. Get your learner portal(s) looking just as you'd like them.

During Configuration & Branding:

- We'll use one of your scheduled check-ins to go through and configure system settings.
- You'll add your branding elements to your user portal(s) to get them looking the way you'd like

Testing

Weeks 9-10

With everything in place, it's time to make sure you love your new learning platform. And if anything's not quite right, we'll fix it.

During Testing:

- We'll orient you to your new solution using a combination of resources, including a check in
- Your stakeholders will participate in UAT to confirm the setup works for them, that the data is in the right place, and identify any areas for improvement before the platform goes live
- **ExpertusONE** will test integrations thoroughly in anticipation of the cutover and address feedback from your UAT
- Together we'll review go-live steps

Deployment

Weeks 11-12

Get ready to go-live on ExpertusONE!

During Deployment:

- You'll communicate the upcoming transition to users and make adoption resources available
- Together we'll confirm that the system is ready and that integrations are operating
- On go-live day, your team will cut access to the old system and replace it with ExpertusONE
- Together we'll monitor the rollout to ensure success

Post-Go-live Support

Ongoing

Keep the momentum going with your new solution and start measuring your success. We'll make sure that the launch has gone smoothly and keep in touch to keep it that way.

After Go-live:

- We'll continue with quick optimization check-ins after launch to ensure that your questions get answered and that you're maximizing your solution.
- Together we'll:
 - Evaluate the effectiveness of the new platform at the 6 month mark by comparing new metrics with the baselines we captured during Kickoff
 - Maintain a continuous partnership focused on innovation, value, and mutual success.
