

ExpertusONE Learning Platform: 100% Enterprise, Zero Compromise

Providing high quality, user-centric learning and training experiences should never come at the expense of enterprise-grade LMS functionality—or vice versa. With ExpertusONE, enterprise learning leaders don't have to compromise.

ExpertusONE is the award-winning enterprise learning and training platform that delivers both unparalleled depth of function and best-in-class user and admin experiences. That's why organizations like Johnson & Johnson, Siemens, Hitachi, United Rentals, and ABB choose ExpertusONE for their employee, customer, and extended enterprise learning and training.

NO COMPROMISES FOR

Admins

Rich enterprise-level features and granular controls, with an intuitive interface designed to streamline even the most complex workflows.

Learners

A personalized experience for all learning and training needs—from compliance to enablement to reskilling—accessible anywhere on any device.

Extended Enterprise

Support, empower, and enable your customers and partners with eCommerce, distributed management, and personalized portals.

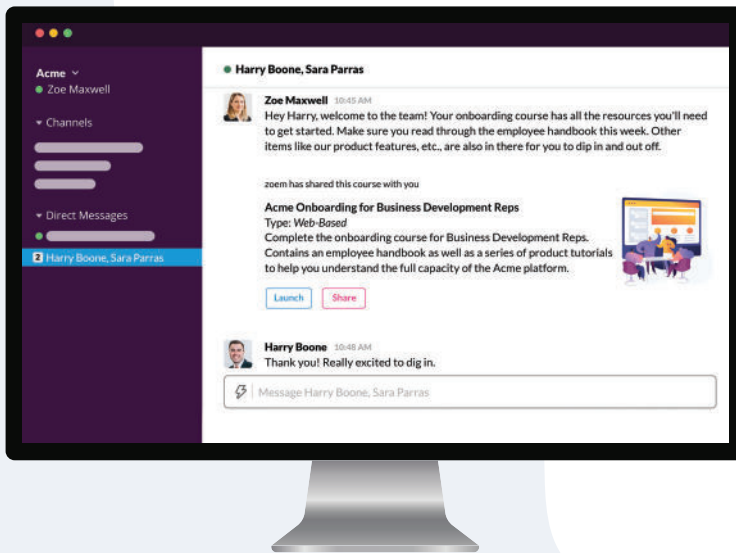

[We] chose the ExpertusONE LMS primarily because of its intuitive usability for employees, managers, distributors, and customers.

— Manager, Education Services at World's Largest Technology Provider

The Only LMS You'll Ever Need

Ease the administrative burden of managing multiple audiences, while maximizing the user experience and value for everyone in your business ecosystem. Here's how:

Put learning in the flow of work with integrations into Slack, MS Teams, and Salesforce

Smarter Learner Experiences

Embed learning into the everyday with integrations or headless learning, making it so effortless to engage that learners don't even think about the LMS.

Integrate any content type you need—even virtual reality—and leverage our adaptive content player to deliver training in one consistent interface.

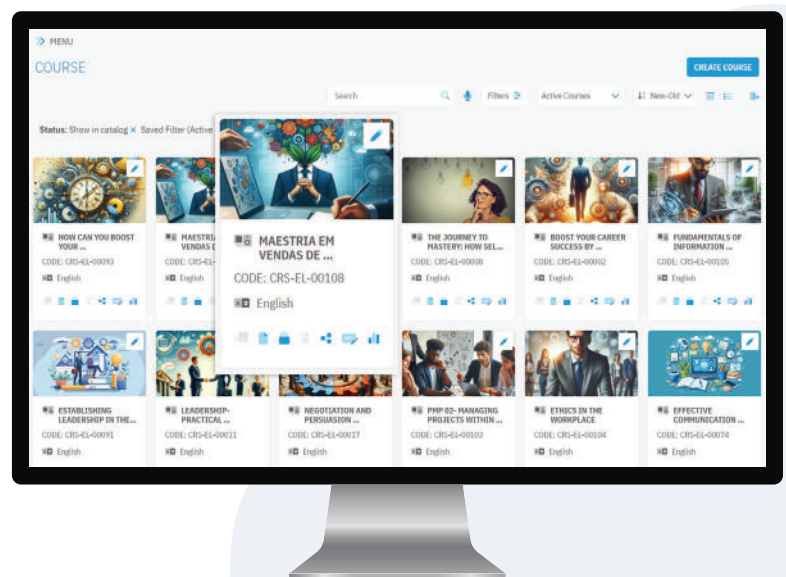

Put relevant learning front and center with smart, relevant recommendations of courses and bite-sized learning.

Effortless Admin Tools

Reduce administrative burdens with automated, intuitive system workflows that free up your team to do more strategic work.

Rapidly develop content with xAPI-compliant microlearning—and without having to learn a complex authoring tool.

Multi-portal capabilities enable you to set up and deploy as many domains as you need, each with their own unique branding, URL, security controls, languages, and more.

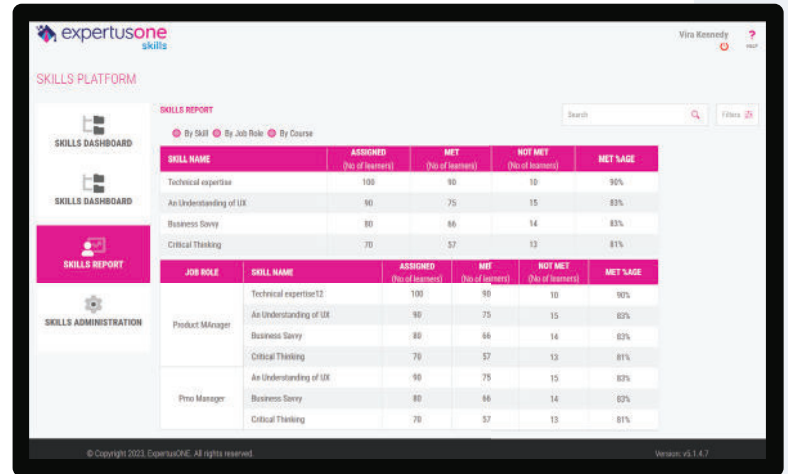

Smart shortcuts take you right to the actions you perform every day

Scalable Skills Management

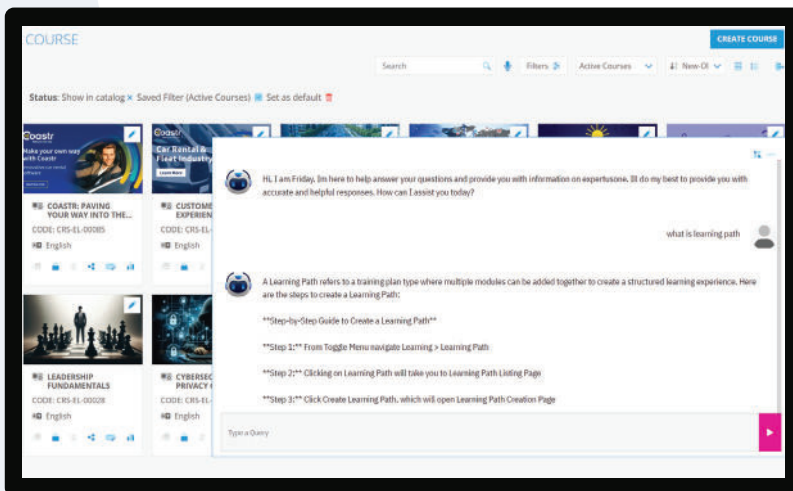

Upskill, reskill and close the skills gap in your workforce with native skills capabilities.

Automate skills assignments, and identify groups for upskilling to keep your organization future-ready.

Our skills gap analyses and skills-based training assignments help stakeholders make strategic decisions.

Drive strategic skills initiatives with proactive learning assignments and data-informed tracking

Our modern platform optimizes for AI, such as natural language chatbots, and facilitates the flow of data

AI-Native, Technology-Forward Platform

A completely modern platform architecture to take advantage of new advances in technology, like AI.

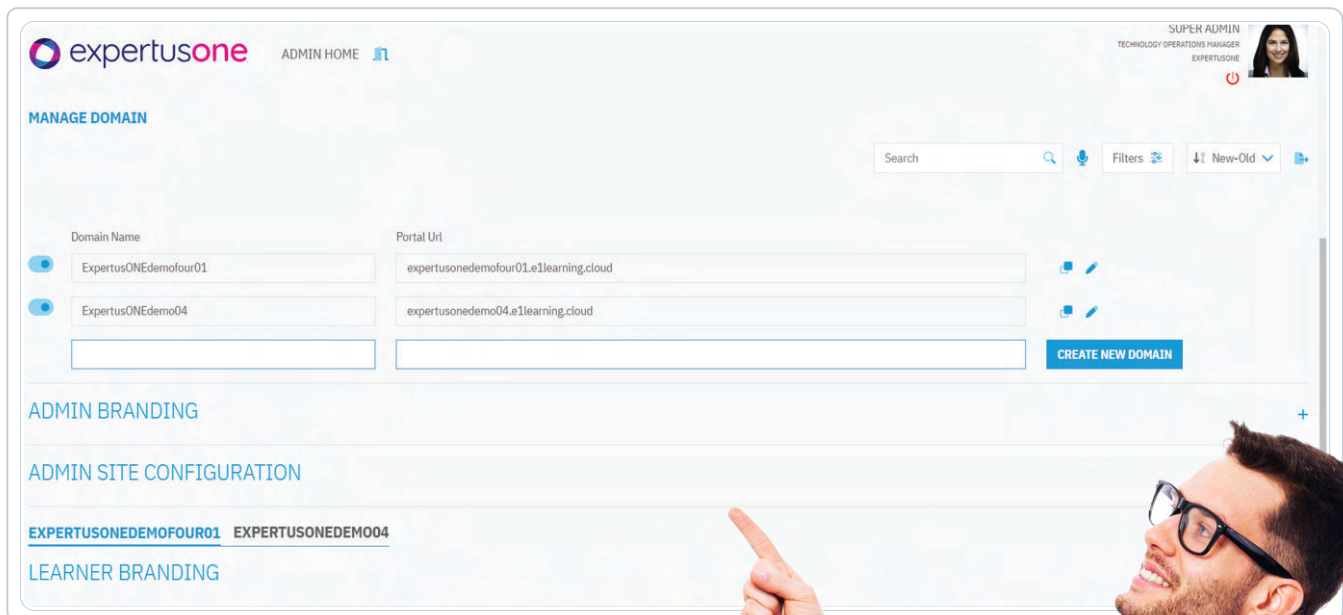

Seamless integrations with over 150 APIs, including Salesforce, Teams, and Slack.

Deep analytics and reporting that offer drag-and-drop report creation, an AI report assistant, and automatically generates compelling data visualizations.

Robust and Intuitive Extended Enterprise Management

ExpertusONE is built to enable you to seamlessly manage and control all your different users, all while making everything from content to administrative tasks a breeze. With ExpertusONE, you get:

- Unique interfaces and training programs for every learning group
- Best-in-class multi-domain management capabilities
- Distributed administration for designated customer or partner representatives
- Configurable partner or franchise portals
- Advanced eCommerce functionality and reporting
- International, multi-currency management

The screenshot displays the 'ADMIN HOME' interface for ExpertusONE. At the top left is the 'expertusone' logo and 'ADMIN HOME' with a bell icon. At the top right, it shows the user 'SUPER ADMIN' with a profile picture and a power button. The main section is titled 'MANAGE DOMAIN' and includes a search bar, filters, and a 'New-Old' dropdown. Below this is a table with two columns: 'Domain Name' and 'Portal Url'. The first row shows 'ExpertusONEdemo01' and 'expertusonedemofour01.e1learning.cloud'. The second row shows 'ExpertusONEdemo04' and 'expertusonedemo04.e1learning.cloud'. There are edit and delete icons for each row. A 'CREATE NEW DOMAIN' button is at the bottom right of the table. Below the table are sections for 'ADMIN BRANDING', 'ADMIN SITE CONFIGURATION', and 'LEARNER BRANDING'. Under 'ADMIN SITE CONFIGURATION', there are links for 'EXPERTUSONEDEMOFOUR01' and 'EXPERTUSONEDEMO04'.

Create custom portals for different learner groups each with their own look, feel, and configurations
