

ExpertusONE

Integrated Skills

ExpertusONE's Integrated Skills unlocks the full potential of your workforce today by eliminating any barriers between skills and learning management. Shape the workforce you need by getting learners the right skills-based training using AI-powered recommendations and paths, ensuring your organization is ready for whatever the future brings.

Create Skills Certainty

With a strong focus on empowering L&D and talent management teams, ExpertusONE is reshaping the way organizations approach upskilling and reskilling. Its Integrated Skills solution offers intuitive dashboards and advanced gap analysis capabilities, enabling teams to identify skill gaps, track progress, and align learning initiatives with business goals. By providing real-time insights into workforce capabilities, ExpertusONE helps organizations stay agile and future-ready. Whether addressing immediate skill shortages or planning long-term talent strategies, ExpertusONE equips teams with the tools they need to drive continuous learning and support workforce transformation.

Take Control of Upskilling

User-friendly dashboards and AI-driven skills matching to accelerate organizational agility.

Support Personalized Learning

Make learning more effective by tailoring programs and content based on individual skills needs.

Enhance Visibility

Access insights into employee skills and competencies at a glance, empowering leaders to make more informed decisions.

Feature Highlights

Fuel strategic upskilling with ExpertusONE's Integrated Skills. It goes beyond skills mapping and follows through with active skills-based learning. These are just some of the features available:

- **Skills gap dashboard:** Gives comprehensive information from the organization to the individual level.
- **Skills library:** A comprehensive repository that provides the complete list of skills available across the organization.
- **Skills to job role mapping:** Allows associating one or more relevant skills required for each job role in the organization.
- **Skills to training mapping:** Provides guidance on which training should be undertaken to address any identified skill gaps.
- **AI-powered skills matching:** ExpertusONE leverages AI to quickly parse through our library of over 25,000 industry-spanning skills and connect skills directly to learners, jobs, and training modules.
- **Skills-based Learner groups:** Create skills-driven learner groups based on any combination of defining factors, such as skills gaps, tenure, job, and manager level, or upload a list of learners best suited for upskilling.
- **Skills assessments:** ExpertusONE automatically generates skills assessments for leaders and assessors. And since ExpertusONE seamlessly integrates with most performance management solutions, you can get the whole picture of the impact of your skills programs.
